

# TOMCAT MODEL 200 AFE

**APPLICATION** Tree Felling | Golf & Housing Estates | River Rehabilitation | Rental Agencies | Alien Clearing

## CHIPPER FEATURES

- 50Hp Perkins water-cooled diesel engine
- Parker hydraulics
- Hydraulic lift cylinder
- 2 Ton SABS roadworthy trailer
- 7" Over centre clutch
- Easy to operate and maintain
- Unique drum chipper design
- Electronic reversing auto-feed system
- Forward/reverse bar
- Replaceable wear strips
- Foldable feed tray
- Swivel discharge chute
- Parts locally available over the counter
- Toolbox & spare wheel Included

### 200mm Drum-Style Hydraulic-Feed Wood Chippers

The 200 Series wood chipper has a large in-feed opening of 220 x 250mm which allows operators to chip material with side branches - reducing prep time. Two extremely powerful and sharp feed rollers fitted with PARKER hydraulic motors grip onto material to ensure efficient production. The chipper and engine are protected by an electronic reversing auto-feed, which ensures that the machine cannot be over-fed, increases chipping blade life and reduces fuel consumption. The hydraulic lift cylinder gives the operator the ultimate control - improving efficiency by crushing side branches and allowing the top feed roller to climb onto large logs with ease. Components that require maintenance are easily accessible which limits downtime. This engine-driven wood chipper is fitted with a spare wheel and steel toolbox to protect the battery and tools from theft. The foldable feed tray comes standard and assists the operator to place into the opening of the wood chipper while simultaneously creating a safer working distance. The Model 200 AFE wood chipper is built standard on a roadworthy trailer with a brake axle. This wood chipper is also available as PTO to hook behind a tractor or with an electric motor.
